## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, drawn to an apparatus for containing solid fuel, classified in class 206, subclass 0.6.
  - II. Claims 13-22, drawn to a solid fuel cartridge, classified in class 96, subclass 147.
  - III. Claims 23-32, drawn to an apparatus for holding a fuel cartridge, classified in class 206, subclass 0.6.
  - IV. Claims 33-35, drawn to a fuel cell system, classified in class 429, subclass 34.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are not capable of use together and have different modes of operation. For example, Invention I is made up of two compartment separated by a valve, while Invention II is made up of several sealed solid fuel compartments.

Inventions I and III are unrelated. Invention III is an apparatus for holding a fuel cartridge that opens or closes the cartridge by moving it.

Inventions I and IV are unrelated. Invention IV uses the cartridge tray of Invention III.

Inventions II and III are unrelated. Invention II is a system of sealed solid fuel compartments that can be selectively unsealed, while Invention III is a system of fuel cartridges that are slidably opened or closed.

Inventions II and IV are unrelated. The cartridges of II could not be used in the apparatus of IV since the cartridges are opened by sliding.

3. Inventions III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require that the fuel be gas. The subcombination has separate utility such as in a different electrochemical device requiring controlled fuel delivery.

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
